

Course Objectives

The overall objectives of the Intermediate Certificate Examination are:

- a) To provide a sound basis for candidates intending to register for either the Test Management Practitioner Examination or the Test Analysis Practitioner Examination. The Intermediate Certificate is a prerequisite for entry to either of these examinations.
- b) To ensure that candidates for either of the Practitioner Certificate Examinations have a broad understanding of the other specialist area (test analysis and test management)
- c) To cover specific topic areas that both specialisations should understand.

The testing skills acquired by attending courses run to this syllabus will be applicable to a wide range of testing challenges that the test practitioner might face.
